# Features

## Smart Scene Adaptive

Dahua unique image processing technology, makes the camera meeting with different light conditions automatically .

## Fisheye

Dahua fisheye camera features a fully customized viewing experience by providing the option of a 360° fisheye overview, 180° panorama, a double 180° panorama, or quad view. The two panorama views and the quad view are dewarped and flattened for a more realistic viewing experience.

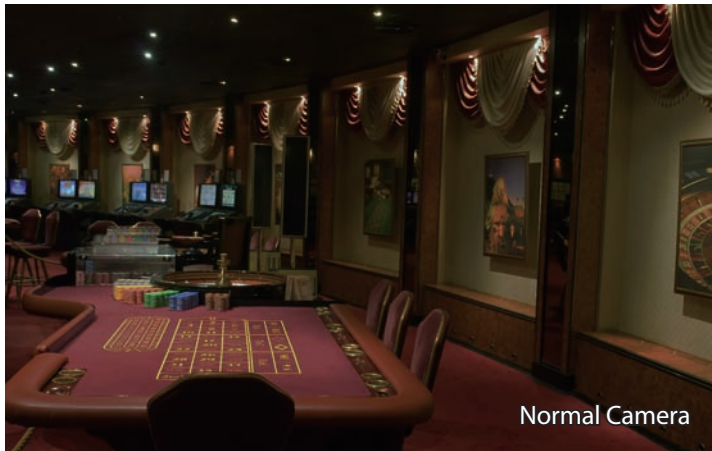

12Mega, 6Mega, 5Mega resolution;  
Day/Night(IR cut), support IR;  
Audio, Alarm support, Micro SD;  
IP67 & IK10 protection.

## Star Light

With an incredible high frame rate of up to 60 frames per second, The camera can capture fast moving objects in high resolution.

## Ultra Wide Dynamic Range

Wide dynamic range is a feature in Dahua network cameras that optimize the image quality in wide range of lighting conditions. In a scene with extremely bright and dark areas or in backlight situations where a object is in front of a bright window, a typical camera would produce an image where objects in the dark areas are hardly visible.

## Video Wall

It supports up to 40 video-wall display units, which can be configured up to 20 rows and 20 columns. For the video input, there are two kinds: The first is the local video, which supports BNC, VGA, DVI, HDMI and SDI input. The other is network video, for example, IPC, DVR, NVR, etc. At the same time the video wall can control the switching operation of an external video matrix.
