# OS, Software AND Applications

Provision-ISR's software and mobile applications are designed with great thought of the user needs while focusing on the ease of use and modern user graphic interface. Each software/App is used with a specific line of products. All of the applications and additional software are free to use and does not bear any additional charges or fees. It is constantly updating and adding new great features to the end users.

## Operating System (NVR/DVR OS)

The Ossia is Provision-ISR's latest recording device's operating system. It is currently used for all of Provision-ISR's recording devices. It is one of the most sophisticated and advanced operating systems available in the CCTV market and keeps improving dramatically through time.

## Advanced Analytics (IPC OS)

Provision-ISR's Smart analytics solutions are now available in selected IP Camera models. This includes: Object Monitoring, Camera Tampering, Line Crossing and Sterile Area. Some cameras support advanced analytics as well.

## IP Manager (PC Software)

The IP Manager is used for quickly locating Provision-ISR's DVRs, NVRs and IP Cameras. There are extensive configuration capabilities for static IP cameras. Provision-ISR's PTZ cameras and 3rd party ONVIF cameras can be found as well by the IP manager but cannot be configured like static IP Cameras.

## Professional CMS (PC/Mac Software)

Provision-ISR's CMS (Central Management Software) can be used with all of Provision-ISR's products. It supports our internal communication protocols as well as ONVIF protocol. (using ONVIF offers limited functionality).

## Provision Cam2 (Mobile App)

The "Provision Cam2" application is used for Provision-ISR's DVRs, NVRs and static IP Cameras only. It can be used with iOS and Android based mobile phones.

## Provision PnV2 (Mobile App)

The "Provision PnV2" application is used for Provision-ISR's PnV Cameras only. It can be used with iOS and Android based mobile phones.

*an experience of harmony...*

Ossia is the latest OS for Provision-ISR's DVR/NVR systems. It is one of the most innovative operation systems available in the market. It offers full compatibility with all of Provision-ISR IP cameras with full control over all main features. Moreover, it offers the user all required tools for complete utilization of the system while keeping things simple and intuitive.

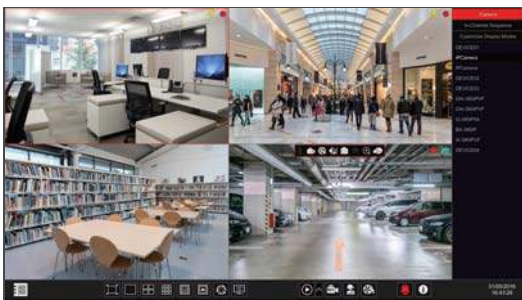

**New Capabilities:**

- H.265 Encoding Support\*
- Manual Alarm Output
- Up to 8MP Support\*
- 4K (Ultra HD) Support\*
- Basic Analytics Support
- Enhanced Security Features
- Advanced Network Protocols (HTTPS, QoS, 801.X, Etc...)
- PoS (Coming Soon)
- Scheduled Push/E-mail Notifications
- CMS Feature\*

**In-Channel Operations:**

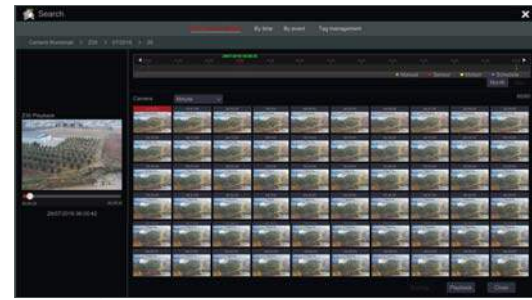

- In-Channel Playback
- In-Channel Sequence\*
- In-Channel Digital Zoom
- In-Channel PTZ Operations

**Smart Configuration:**

- Advanced HDD Management
- Double Stream Recording
- Situation Dependent Recording
- Default Username/Password Configuration
- RTSP Input configuration
- Dynamic Hybrid\*

**Search, Playback and Backup:**

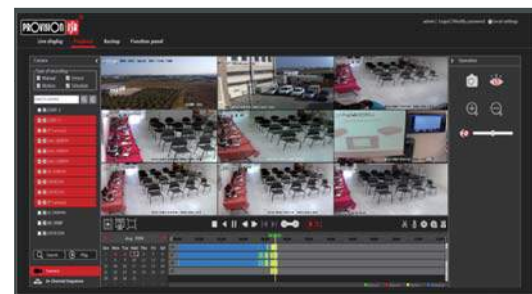

- New and Intuitive "Picture Slice Search"
- Instant "Sub-Stream" Playback
- One Click Backup
- Smart Time-Bar View and Control
- Multiple Backup Tasks
- FTP Backup

**Intuitive Operations:**

- One-Click Manual Record
- One-Click Alarm/Relay Output

# Video Analytics

## Sterile Area

Detects if any object entered the defined area. This analytics cannot distinguish between a human being and other objects entering the area.  
Up to 4 areas can be monitored in at any given time.

## Line Crossing

Detects if an object crossed a defined line. The crossing direction can be adjusted from each side of the line or from both sides.  
Up to 4 lines can be monitored at any given time.

## Camera Tampering:

Designed to detect tampering with the camera. It can detect and alarm 3 situations:

1. Camera shifting: In case the camera was forcibly moved out of place so it wouldn't cover the required area
2. Camera Masking: Detects if the camera was covered or tampered in a way that blocks its view.
3. Lens Tampering: Detects lens tampering causing blurred image.

Camera Masking

Lens Tampering

Camera Shifting

## Object Monitoring

Object Monitoring Analytics can work in one of two methods: Missing Item and Left Item.

Missing item will detect if the marked item was moved or taken while left item will detect if an item was left behind in a defined area.

Up to 4 objects or areas can be monitored in at any given time.

Missing Objects

Left Objects

## People Counting

Enables the camera to count how many people has entered and exited a defined passage.

Upon configuration, the user can set the incoming, outgoing and staying thresholds meaning that the camera will generate an alarm once any of these thresholds will be reached.

The counter can be reset on a daily, weekly or monthly basis.

## Crowd Gathering

Allows the camera to detect when there is a gathering of people in a defined area. Once the defined area will be filled with people as configured — an analytic alarm will be generated.

The alarm trigger is based on the definitions of area, crowd density (Percentage) and schedule.

## People Intrusion

Covers the whole scene (Area cannot be configured) and focus detection on people movement only. All other objects entering to the scene will be disregarded (Vehicles, animals, garbage, Etc.)

The alarm trigger is based on the definition of schedule only.

# IP Manager

The IP manager is a free PC software used to detect all NVRs, DVRs and IP Cameras in the local network. It is also used for advanced and quick IP camera configuration.

## Main Features:

- Detects all Provision-ISR devices in the network
- Detects ONVIF cameras in the network
- Offers live preview of the selected Provision-ISR camera
- Showing all the information needed by the user (Configurable)
- Allows single/batch camera configuration including:
  - Full network parameters setting
  - Firmware update
  - Password settings
  - Picture settings
  - Stream Settings
- Allows initializing camera reset protocol

## Software Update:

Update IPC software/kernel directly from the tool. It is possible to update several IPC from the same type together.

## Network Settings:

Configure network settings for 1 IP camera or more. You can either set fixed IP or DHCP from the tool.

## Stream Settings:

Set the video stream of the camera. This should only be used if the camera serves as a standalone. Only cameras with v3.4.2.1 and up will support this feature.

## Set Picture:

Quickly set all the pictures parameters (3D-DNR, Mirror, Flip, IR, Etc.) for all the required cameras.

## Modify Password:

Securing your site is top priority. This tool will allow you to modify the password of all IPC in a single click.

## Camera Reset:

Reset the camera directly from the tool (Requires additional actions for security reasons).

# Professional CMS

Provision-ISR's CMS is a free PC Software used for all imaging products from Provision-ISR (DVRs, NVRs and IP Cameras). It offers simultaneous live view and playback from multiple devices and full remote configuration for recording devices and cameras. The CMS is a professional software that requires some learning and understanding of the software's method of work, but once understood, it offers great features for complex installations and multi branch complexes.

## Main Features:

- Support of up to 1000 devices
- Multi device live view
- Single login for all devices
- Web-client access
- Map Support
- 2 Way Audio Support - listen and talk
- Manual alarm trigger
- Remote Playback
- Local video recording and playback
- Local Snapshot
- Full Device Configuration (remote)
- PTZ Support
- Camera group configuration
- Smart user management
- Multi-Screen Display
- Multi-Language Support
- ONVIF Device Support (Limited)

PROVISION ISR <i>Now you can see!</i>		CMS Live View Capabilities									
Test Method	1. The test was done on a dedicated computer. No other softwares are installed or running while the CMS is working. 2. The IPC is monitoring a live scene with constant movement. 3. When the PC CPU usage rises to around 100%, we record the number of live channels. 4. We keep the memory usage (RAM) is under 80% so the OS will have enough resources for operating normally.										
NO.	PC Hardware					Support Channels					
	CPU	Frequency	Memory (RAM)	Display Card	Display Card Memory	CIF 25fps/CBR/ 1Mbps	D1 25fps/CBR/ 2Mbps	720P (1MP) 25fps/CBR/ 6Mbps	960P (1.3MP) 25fps/CBR/ 6Mbps	1080P (2MP) 25fps/CBR/8Mbps	3MP 25fps/CBR/8Mbps
1	Inter®Core™ i7-4790	3.6GHZ	8.00GB	GeForce GST 450	2724MB	~108	~48	~22	~16	~9	~6
Conclusion	1. As we can see, the support channel number is directly influenced and limited by PC decode capability.										

PROVISION ISR <i>Now you can see!</i>		CMS Recording Capabilities											
Test Method	1. The test was done on a dedicated computer. No other softwares are installed or running while the CMS is working. 2. IPC simulator provides master stream of 1080P/4Mbps and sub stream of D1/1Mbps. 3. We monitor the system resources (CPU, RAM & Network) and note their status when increasing recording channels. 4. Once one of the resources is reaching 100% usage, or the video stream becomes unsmooth, we write down the number of recorded channels and the resource that was depleted.												
NO.	Hardware				HDD Information			Recording Channels		PC Status	Remark	With Preview	
	CPU	Frequency	Memory	Network	Model	RMP	Date Speed	D1 25fps/CBR/ 1Mbps	1080P (2MP) 25fps/CBR/ 4Mbps				
1	Intel®Core™ i7-4790	3.6GHZ	4.00GB	1Gb Ethernet	SeaGate ST500DM002-1BD142	7200/min	600MBps	~800	~200	CPU<20% Memory<50% Network>85%	With recording channels of up to 200/800 and strong PC hardware, the network usage is over 85%. As a result the video stream became a little unsmooth when playback the record files. In this case, the network is the bottle neck.	With 8ch 1080P/25fps/8Mbps live view, CPU usage will be 100%, play record file is not smooth any more.	With 4ch 1080P/25fps/8Mbps live view, CPU usage is around 80%, play record file is smooth.
Conclusion	1. According to network specs, normally Gigabite network card can support no more than 250 channels (4Mbps per channel), under optimum conditions 2. When recording channels are ~200, i3/i7 CPU PC can handle extra live view as shown in the table above												

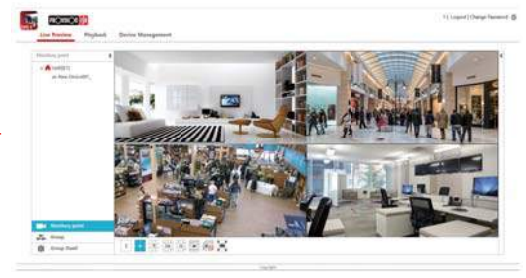

### Remote Configuration:

The CMS allows full configuration on both local and remote parameters and over all devices connected to it.

### Remote Web-Client:

The CMS requires powerful hardware in order to run smoothly. If you need more than 1 CMS workstation - the CMS can be installed on 1 powerful PC that will be connected by less powerful computers over LAN/WAN.

### E-Map Support:

You can set your cameras on top of electronic maps and view it in a click of a mouse button. Multiple maps can be added - creating layers and zoomed-in zones.

### Local/Remote Playback:

Supporting both remote (saved on device) and local (saved on PC) playback of up to 16 channels (depends on device's technical specs). All events types are supported including analytics.

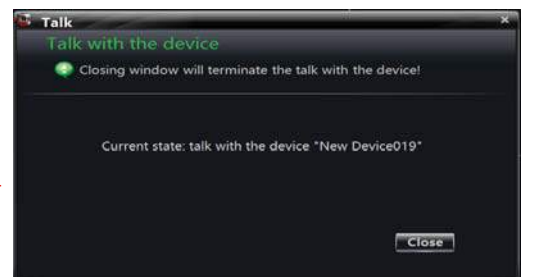

### Alarm Monitoring:

The CMS synchronizes with all the alarm inputs/outputs of the devices connected to it. Therefore it allows easy monitoring over sensors and alarm relays and activating alarm outputs directly from the main screen.

### Two Way Audio:

As a monitoring station - the CMS allows you to have two way audio with all supporting devices (Both incoming and outgoing audio)

### Multi-Screen Display:

Multi Screen view allows you to utilize your CMS over several PC screens. Using tabs, each screen can display a chosen view individually (For example: Live view, map, settings and Playback). In other situations, the screens can all display live view images at the same time so more channels will be viewed in larger size.

# Provision CAM2

Provision Cam2 is a free application for iOS & Android devices. It is compatible with all NVRs, DVRs and static IP Cameras. It offers the users full control over their devices including live view, playback and settings. It is secured against unwanted access, user friendly and intuitive for all users.

## Main Features:

- Live View in single or multi-channel display mode (Up to 16 Channels)
- Multi device live view
- Single login for all devices (Up to 100 Devices)
- Gesture password for enhanced security
- 2 Way Audio Support - listen and talk
- Local video recording and playback on your mobile
- Landscape view with full features
- Main/Sub stream view.
- Image snapshot with instant sharing options
- Remote playback with time bar. (Up to 4 channels)
- Remote system configuration
- PTZ control
- Color and camera lens adjustment
- Local startup configuration
- Fish-Eye Camera Support
- Push notification Support

### Gesture Password:

The gesture password secures all of your devices under one password. You do not need to log into each device individually.

### Live View:

Provision Cam2 allows you to display your cameras in various display modes: single channel or multi channel.

### P2P Support:

The App supports P2P cloud connection for easy and hassle free remote connection from anywhere in the world.

### App Management:

Through the management console you will add, edit and configure devices as well as managing saved files and configuring the application.

### Picture Sharing:

Your snapshots can now be shared instantly via popular social media applications. It can also be saved locally in your device's media center.

### Local Recording and Remote Playback:

Preserve your evidence! while watching the video stream - just click on "REC" button and start recording immediately the selected camera. You can also remotely playback the recorded information from the device with the help of a new time-bar.

### Push Notifications:

Provision Cam2 supports push notifications for both iOS/Android devices. The user can schedule the push notifications and choose which alarms will send push notifications and which alarms will be ignored.

### App Help:

The app contains simple guides that will brief the user about all the icons and features of the app.

### Landscape Mode:

All interfaces allow landscape mode that utilizes your screen size and allows more information to be shown.

# Provision PnV2

Provision PnV2 is a free application used for all IP cameras from PnV series. It offers the easy camera installation for supported models, and full control over the cameras including live view, SD card playback and settings. It is secured against unwanted access, user friendly and intuitive for all users.

## Main Features:

- Live View of single or multi camera display mode (Up to 4 cameras)
- Multi device live view
- Single login for all devices
- Camera access from anywhere in the world based on your user name
- Push Notification Support
- Gesture password for enhanced security
- 2 Way Audio Support - listen and talk
- Local video recording and playback on your mobile
- Landscape view with full features
- Image snapshot.
- Remote playback (Single channel)
- Camera configuration
- Color adjustment
- PT (Pan/Tilt) gesture control

## Live Display and Controls:

Live display shows you all the information needed to confirm the camera is working well such as connection type and speed. It also allows you to move your PT camera using figure gestures and activate all the great extra features of the camera such as:

- Local snapshot/Recording
- Two-way Audio
- Preset set/call
- Vertical/Horizontal Cruise
- Preset Cruise

## Remote Configuration:

The PnV2 application allows you to remotely configure your camera. This includes:

- WiFi Settings
- SD Card Recording
- Password settings
- Push notification settings
- Firmware update.

## Keeping Your Cameras:

All of your cameras will be available under your user name. When using the application for the first time you will be required to register. The user name you have registered with will be linked to all the cameras you will add to it, so it will be available in any device you will log in with your account.

## Application Manager:

The main managing console opens all configuration and setting capabilities of the application. From there you will have all the information you need to maintain your application and devices.

## Push Notifications:

The application now allows push notifications for both iOS/Android devices. The motion alarm can be scheduled so it would not bother you while you are not interested.

## WiFi Installation:

When installing a new PnV camera (compatible cameras only) - you will be able to perform the installation without the need of LAN cable. The installation will be completely wireless (Only power cable is necessary) and the camera will work via WiFi from the first moment without further configuration.

## Multi Channel View:

Multi Channel view allows 4 cameras to be viewed simultaneously in landscape mode.

## Landscape View:

Landscape view utilises your mobile phone screen so you will be able to get a larger view of the video stream. Landscape view still allows full control over all of the camera's features and functions.

# IP Based Solution Series

Provision-ISR offers a broad IP product range for your needs.

The IP Protocol is the most common for communication between computer networks and the Internet. Therefore, It is ideal for streaming a high-quality video through networking infrastructure. IP surveillance technology offers a high-tech flexible solution without compromising reliability or picture quality.

With Provision-ISR's superior built quality, high picture resolution, advanced features and a wide product range, you will surely find your IP based surveillance system solution.

## **Provision-ISR's IP products cover all installation types:**

1. Residential/SOHO Plug & View IP cameras, requiring no previous installation knowledge.
2. Medium installations: characterized by single NVR with several IP cameras.
3. Enterprise installations: numerous cameras linked by POE switches, NVRs and a professional CMS software.

### IP Cameras

Keeping with Provision ISR's high-standard products, our IP cameras provide excellent video and audio compression ability including high quality resolutions from 1MP to 8MP. All our cameras are designed with deepest consideration for the installers needs keeping in mind installation ease, analog output for technician monitors, 3-way-axis bracket, ONVIF, POE, DC12 input and more.

### PnP IP Cameras

Designed for Small residential/SOHO uses. Featuring local storage; Wi-Fi connectivity and plug & view function. Requiring no previous installation knowledge

### NVRs

Provision-ISR's NVR line is designed under the guideline of keeping the DVR familiar interface together with simplifying the new IP NVR platform. Our NVR systems offers two main product lines: Conventional NVRs that recognize and interact with IP cameras via the network and PoE/Plug & Play NVRs that work in a closed system where the IP cameras are connected directly to the NVR and configured by it.

### IP PTZ Cameras

Our IP PTZ cameras offer HD resolutions (2MP/3MP) in two focal lengths (x20 & x30). All PTZ Cameras in this series offers long IR range, common IP protocols support ONVIF, RTSP, TCP/IP and many installation options.

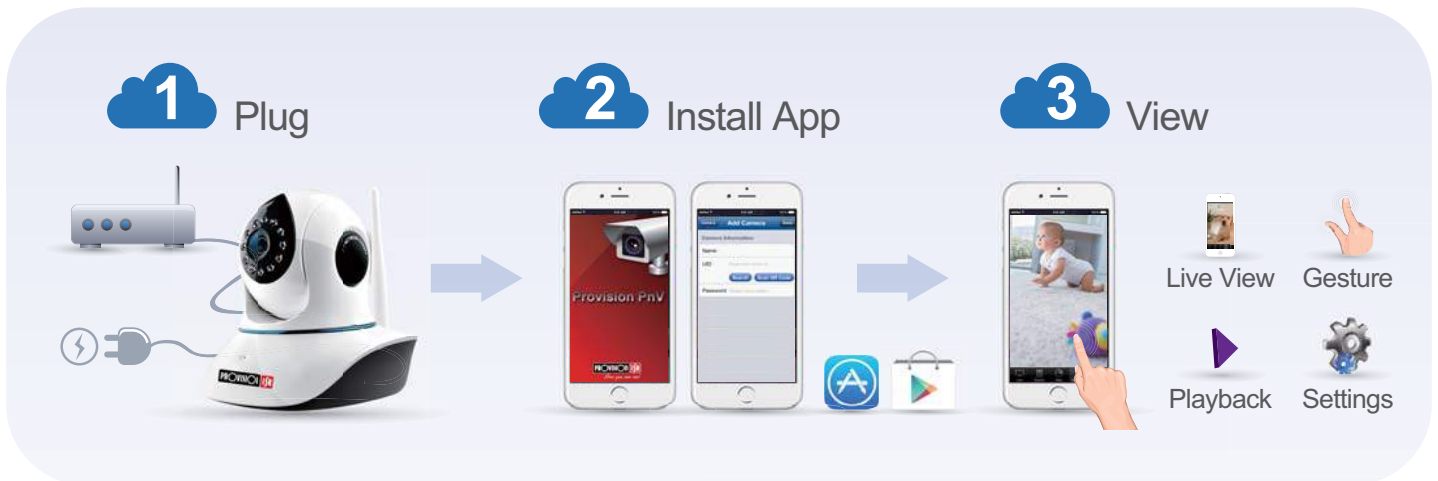

### PoE Switches and Accessories

PoE switches and installation accessories will make any IP system installation easier and more reliable.

# IP Based Solution Series

## IP Cameras

Provision-ISR's IP camera line provides excellent video performance along with elegant, installation-friendly design. All cameras support PoE, ONVIF and 3-way-axis bracket. When connected and configured properly, the IP camera can be accessed independently via CMS/IE client without the need of an NVR. This provides a higher level of flexibility with the users' administration and the ability to use an IP camera as a standalone monitoring device.

We understand our users' requirements so we developed 5 different camera lines:

**Dark-Sight:** When high resolution cameras under extreme low light condition are needed.

**Eye-Sight:** The largest series of cameras and installers' preferred choice with focus on great image quality.

**X-Sight:** 2MP series with incredible night performance.

**S-Sight:** Addresses more cost sensitive solutions.

**Special Cameras:** Designed to cover special installation needs.

All camera lines provide excellent picture with high quality data compression, together with upgradable ONVIF to expand connectivity options for cameras with existing installations and various NVRs and CMS software.

## Dark Sight (5MP)

Provides high resolution video stream with full connectivity alongside extraordinary night performance.

- True Day & Night (ICR)
  - Min. Illumination 0.001Lux
  - H.265+ Video Compression
  - Digital WDR/BLC/HLC
  - ONVIF
  - PoE
- 5MP:**
  - 5MP Resolution (2592x1944)
  - 1/1.8" CMOS

## Eye Sight (8MP, 5MP, 2MP)

The largest series of cameras and Installers preferred choice with focus on great image quality.

- True Day & Night (ICR)
  - H.265/H.264 Compression
  - BLC/HLC
  - Great Night Performance
  - ONVIF
  - PoE
- 8MP:**
  - 8MP Resolution (3860x2140)
  - 1/2.5" CMOS
  - D-WDR
- 5MP:**
  - 5MP Resolution (2592x1944)
  - 1/2.5" CMOS
  - True-WDR
- 2MP:**
  - 2MP Resolution (1920x1080)
  - 1/2.7" CMOS
  - True-WDR

## X-Sight (2MP)

2MP series with incredible night performance.

- True Day & Night (ICR)
  - Superb Night Performance
  - H.264 + Video Compression
  - ONVIF
  - PoE
- 2MP:**
  - 2MP Resolution (1980x1080)
  - 1/2.8" CMOS

## S-Sight (4MP, 3MP, 2MP)

Addresses more cost sensitive solutions.

- True Day & Night (ICR)
  - H.264 Compression
  - ONVIF
  - PoE
- 4MP:**
  - 4MP Resolution (2592x1520)
  - 1/3" CMOS
  - H.265
  - Analytics
- 3MP:**
  - 3MP Resolution (2048x1536)
  - 1/3" CMOS
- 2MP:**
  - 2MP Resolution (1920x1080)
  - 1/2.7" CMOS

## Special Cameras(6MP, 4MP, 2MP)

Designed to answer special installation needs.

- 6MP Fish-Eye:**
  - 6MP Resolution (2160x2160)
  - H.265/H.264
  - 360° View
  - ONVIF
  - PoE
- 4MP Video Server:**
  - 4MP Resolution (2592x1520)
  - 3 in 1 Solution
  - H.265/H.264
  - ONVIF
  - PoE
- 2MP Star-Sight:**
  - 2MP Resolution (1920x1080)
  - H.265/H.264
  - 0.0003 Lux Min Light
  - ONVIF
  - PoE
- 2MP Pinhole:**
  - 2MP Resolution (1920x1080)
  - H.265/H.264
  - Pinhole Lens
  - ONVIF
  - PoE

# IP Based Solution Series

## IP PTZ

### Ultra-Z IP Network IR PTZ Camera

The IP Ultra-Z IR PTZ gives you the versatility of an IP camera while preserving all the best features of the Ultra-Z series: It's faster, more accurate and its video performance is better than ever even in complete darkness!

Available with 2 zoom ratios options (x30 & x20), the IP Ultra-Z series will give you the desired versatility when designing video surveillance system for any scene.

#### Ultra-Z IP Main Advantages

#### Ultra-Versatile

Featuring IP capabilities, upgradable ONVIF protocol, two-way audio, in/out alarm, dual videos stream and advanced H.264 compression, making it compatible with almost all installation scenarios.

#### Ultra-Reachable

By supporting ONVIF and other common network protocols the IP Ultra-Z can communicate with dozens of monitoring softwares and NVRs. Moreover, it has a built-in web-client for viewing, controlling and configuring the camera locally and remotely.

#### Ultra-Bright

Equipped with smart IR LED array that reaches 100m-150m (depending on model), this camera will be able to handle even pitch-black scenes and give you superb results.

#### Ultra-Accurate

Ultra-Z high-speed series performs an outstanding "preset" accuracy of up to 0.1° due to the unique micro-step technology.

#### Ultra-Rugged

The Ultra-Z has an ingress rating of IP66 against rain and dust that allows it to withstand the tough environmental conditions for any outdoor installation.

#### True Day & Night (ICR)

All Ultra-Z cameras come with removable IR cut filters, to improve low light performance.

#### High Resolution

Ultra-Z cameras perform at a Full HD high definition resolution of 1080P.

### Mini-Bullet IP PTZ Economic Solution When PTZ Is Needed For the Right Price

The Mini-Bullet IP PTZ gives you the versatility of an IP PTZ camera just with an economic design. It is made of plastic, fitted with slower motors and shorter zoom ratios

It is available with 2 zoom ratios options (x4 & x10) to give more versatility when choosing the right solution.

# IP Based Solution Series

## NVRs

In standard installations - the NVR will be the heart of the IP System. It is responsible for the constant recording of all the data received from the connected cameras. Unlike DVRs, the NVR doesn't compress the video signal received from the IP camera but only stores it in the same way as it was compressed by the camera.

All of our NVRs support ONVIF that can be upgraded when newer versions are released. ONVIF is a communication protocol for IP

cameras and NVRs. It became the standard protocol and assists IP cameras and NVRs from different companies to be able to interact with each other simply and effectively. Our engineers keep improving and updating the ONVIF compatibility of our IP equipment in order to give the installers the easiest way of working with Provision-ISR IP Products.

### Conventional NVRs

This line of NVRs is connected to the network and communicates with the IP cameras through the general network, without the need of direct IP camera connection. This provides the installer highest flexibility in the design of the system and the wiring. Basic knowledge in networking and general IP configuration is required.

### PoE NVRs

This line of NVRs performs as a local network switch by creating a closed internal network for the IP cameras. The IP cameras will be connected directly to the NVR by network cables which will provide PoE. Once powered on, the NVR will automatically configure the camera for display & record. These NVRs may also perform as conventional NVRs. No previous knowledge is required for this type of installation.

# Special Features (Selected models only):

## Dual Network

Designed to increase the NVR reachability (being connected to 2 independent networks on a given time) or to increase durability and reliability (By being connected to 2 identical networks)

## Advanced Connectivity

All NVRs will adapt the advanced connectivity (Alarms/Audio) from the IP cameras. Some NVRs support integral advanced connectivity to connect controllers and other required equipment.

## E-SATA

E-SATA (External SATA) can be used to increase the NVR storage capacity and to created external safe storage of your recording.

## Triple Display with Dual Layout

NVRs with this feature allows you to connect up to 3 monitors to the NVR (2 HDMI + 1 VGA), with ultra high resolution of up to 4K, that will allow you to trully enjoy the high resolution from the IP Cameras. Through the Ossia you will be able to simply set the desired display to the required monitor.

## Understanding the Resolution Markings

HD Resolutions are like an inverted pyramid.

If a NVR supports a resolution from the top of the pyramid, it will support all resolutions lower than it. For example if a NVR supports 3MP (Real-Time) it will support 2MP, 1.3MP and 1MP (Real-Time)

Model Names (Model Name Starting with):

- NVR - 720P Real-Time
- NVR2 - 1080P Real-Time
- NVR3 - 4MP Real-Time
- NVR5 - 8/5MP Real-Time

720P 960P 1080P

The first supported resolution from the left is real time for all channels. All the following resolutions are non-real-time or real-time for some of the channels.

5MP

The Marked supported resolution and all the resolutions below are real-time for all channels Higher resolutions are not supported.

## Product Series

PoE (Power over Ethernet) describes the standard which allows a single ethernet cable to provide both data connection and electrical power to devices like IP cameras or wireless access points.

The PoE standardized by IEEE 802.3, and it is marked as IEEE 802.3af or IEEE 802.3at. Any product that doesn't support these protocols does not officially supporting PoE.

All models are fully with IEEE 802.3 standard and automatically detect power device (PD) and power consumption level.

**10/100**

### 10/100Mbps PoE Switches:

These PoE switches are the best choice for any standard installation. It is especially designed for IP surveillance giving extra reliability and installation simplicity. With 4/8/16/24 port options, standard uplinks and SFP ports (depending on model) - you can find a solution for any installation.

**10/100/1000**

### 10/100/1000Mbps PoE Switches:

The 1000Mbps (gigabyte) PoE switches are made for true professionals. The standard switches with 4 or 8 ports were designed for heavy-duty work. The professional 16/24 Port switches, equipped with an LCD monitor, were designed to display all the PoE system information on the front panel of the device.

### PoE Accessories:

The accessories line was designed to complete installation details, offer solutions for specific problems, or transform an analog CCTV system to a state of the art IP surveillance system using the same infrastructure.

## Special Features (Selected models only)

### CCTV Mode

The CCTV mode is actually a preconfigured VLAN (Cannot be customized by the user) that prevent all communication among the downlink ports. The CCTV mode also limits the communication to 10Mbps to increase stability.

#### The achieved benefits of CCTV mode are:

- No communication among downlink ports (VLAN) improves the network security and data transmission efficiency.
- Limiting the communication speed to 10Mbps increases the communication distance to a maximum of 250 meter.

### Status LCD Screen

We created an outstanding advantage for selected 1U PoE switches by equipping it with a LCD screen which gives a real-time status indication for each of the ports. This will make installation easier, increase safety and feedback useful information during routine work while facing network issues.

#### Indications available are:

- Single Channel Output Power (W)
- Overload (OLP)
- Short circuit (SCP)
- Low voltage/Over voltage (warning)
- High temperature (warning)
- Light load (ULP)
- and more...

#### Temperature Warning

**WARNING!**  
The PSE device is too hot!  
All ports are shut down.

#### Low/High Voltage Warning

**WARNING!**  
Main supply voltage is high!  
All ports are shut down.

**WARNING!**  
Main supply voltage is low!  
All ports are shut down.

### SFP and "Combo" Uplink Ports

Selected models are equipped with "Combo" or SFP uplink ports. "Combo" ports can be used as standard RJ45 Ethernet uplinks or as SFP (Small Form-factor Pluggable) ports that are usually used for data transmission via fibre optic.

## Special Features (Selected models only)

### High PoE

High PoE adopts the latest IEEE 802.3bt protocol which uses all four pairs in a network cable. Each High PoE port can provide up to 60W of DC power to connected device. Comparing with the previous standards "at" and "af" which supports power output of 15 watts and 30 watts respectively, High PoE can provide up to 100% more power.

The High PoE is designed to answer the growing demand for high power consuming network devices such as IP Speed Domes, and at the same time allows to extend PoE applications for over 100 meters by using Hi-PoE PD (Powered Device) switches.

The current High PoE device selection can provide you with a complete solution for any installation and includes.

# PoE Accessories

## 1 Ch PoE Ethernet Splitter

Split PoE Port to DC Power + 10/100 Mbps Ethernet.  
 Designed for applications where having a PoE Switch and an end device which does not support PoE. the Splitter Split the PoE line to 2 independent Ethernet and DC lines

### Model: PoESP-0112S

- Adjustable output 5VDC/2A, or 9VDC/1.5A or 12VDC/1A
- Maximum Power Output: Up To 12W.
- Short-Circuit Protection.
- High Efficiency DC/DC Converter
- Complies With IEEE802.3af Power Over Ethernet

### Model: PoESP-0124W

- Adjustable output 5VDC/2A, or 9VDC/2A or 12VDC/2A
- Maximum Power Output: Up To 24W.
- Short-Circuit Protection.
- High Efficiency DC/DC Converter
- Complies With IEEE802.3af/at Power Over Ethernet

### Model: PoESP-0160W\*

- 24VDC / 2.5A Output
- Maximum Power Output: Up To 60W\*.
- Short-Circuit Protection.
- High Efficiency DC/DC Converter
- Complies With IEEE802.3af/at/bt Power Over Ethernet

Requires High-Power 60W PoE input

## 1 to 2 CH PoE Extender (Repeater)

### Model: PoER-02

Split 1Ch PoE to 2Ch and extend the PoE signal for additional 150 meters. Designed for applications where PoE camera or 2 are located over 100 meter distance from the PoE switch. Allows to transmit both camera's PoE signal over 1 Ethernet cable. This should simplify the installation, save on cabling cost and labor.

- Extends PoE Range Up To Additional 150 Meters
- 10/100Mbps Ethernet
- 1 Ch input / 2 Ch Output
- No Additional Power Supply Is Required\*
- Automatically Detects And Protects PoE Equipment From Being Damaged By Incorrect Installation
- Compliance With IEEE802.3 10BASE-T, IEEE802.3u 100BASE-TX, IEEE802.3af/at standards
- Wall Bracket/Earthling Terminal
- Rail (mail/female) design to attach several units In a row

\* Will cause a power loss of approx. 3 watt for its own operational use.

\* Power (Watt) supplied to the camera in the end of the line depends on: Number of cameras ,cable distance and quality, and PoE power input.

## PoE Accessories

### 1 Ch PoE Extender (Repeater)

Model: PoER-01

Extends PoE Signal for additional 100 meters.  
Designed for applications where PoE camera located over 100 meters from the PoE Switch.

- Extends PoE Ethernet line range for up to 100 additional meters
- 10/100Mbps Ethernet
- No Additional Power Supply Is Required\*
- Automatically Detects And Protects PoE equipment from being damaged due to Incorrect Installation

\* Will cause a power loss of approx. 3 watt for its own operational use.

\* Power (Watt) supplied to the camera in the end of the line depends on: Number of cameras ,cable distance and quality, and PoE power input.

### 1 Ch PoE Ethernet Injector

Turn Non-PoE Port to PoE port.  
Designed for applications where PoE is required but there is no PoE switch on the site.

Model: PoEI-0130

- Downlink: 1x100Mbps Ports
- 30 watt maximum output
- Internal Power Supply (Requires 110/220AC Input)
- Complies With IEEE802.3af/at Power Over Ethernet.
- Distance: Up to 100 Meter
- Built-in Surge Protection

Model: PoEI-0160

- Downlink: 1x100Mbps Ports
- 60 watt maximum output
- Internal Power Supply (Requires 110/220AC Input)
- Complies With IEEE802.3af/at/bt Power Over Ethernet.
- Distance: Up to 100 Meter
- Built-in Surge Protection

### Non-PoE Power Over Ethernet Converter

Model: DCoE-01

Designed To transmit DC Power and Ethernet Over Ethernet Cable.

- Full Set - Transmitter/Receiver
- 50 Meter working distance over standard Cat5e/6 cable
- Requires Camera External Power Supply
- Supply a DC Power Input To Camera and - not PoE

## PoE Accessories

### Ethernet over Coax (EoC)

Model: EoC-01

Designed for applications where IP camera is replacing an existing Analog camera so the Coax cable and DC12V power infrastructure are already available.

- Full Set - Transmitter + Receiver
- Up To 150 Meter of Ethernet over Coax
- Up to 1.5m for each ethernet cable (Cat5e Standard)
- 10Mbps Ethernet
- Passive Units: No Power supply needed for the EoC-01.
- Requires that the camera will be powered on

### Ethernet + Power over Coax (EPoC)

Model: EPoC-01+

Designed for application where coaxial infrastructure is available, but power is not.

EPoC-01+ allows to transmit Ethernet signal and PoE power over coax cable.

The units can be cascaded for up to 4 IPC to be transmitted over a single Coax cable.

- Full Set - Transmitter + Receiver + 48VDC PSU
- Up To 500 Meter of Ethernet over Coax
- Up to 1.5m for each ethernet cable (Cat5e Standard)
- 10/100Mbps Ethernet (EEE802.3 / IEEE802.3u)
- Surge/Lightning protection design
- No configuration required

## BX-392AHD

MODEL	BX-392AHD
Image Sensor	1/3" CMOS
Image Format	16:9
Effective Pixels	1984(H)×1225(V)
Scanning System	Progressive
Resolution	Digital:1920x1080, Analog:960H
Min. Illumination	0.01Lux
Day & Night	True Day&Night (ICR)
IR LED	No
OSD Menu	Available (11 Languages, AHD/CVBS Output Selectable)
CoC Support	CoC Support
Day & Night Mode	EXT, Color, B&W, Auto
Backlight Compensation	Off/BLC/HSBLC
S/N Ratio	≥60dB (AGC Off)
White Balance	ATW,AWC,Indoor,Outdoor,Manual,AWB
Noise Reduce	3D-DNR For AHD / 2D-DNR For CVBS
Video Output	AHD/CVBS (Signal Selectable from OSD)
Defog	Off/On
Privacy Mask	On/Off (4 Areas)
Motion Detection	On/Off (4 Areas)
D-Effect	Freeze, Mirror, Negative Image
Lens (Field of View)	CS Mount
Power	DC12V±10%, ~100mA
Operation Temp.	-10°C~+50°C
Waterproof	No
Dimension	123.5x63.7x65mm
Net weight	300g

### Main Features:

- Sensor: 1/3" ,2 Mega-Pixel
- Selectable Output-1080P AHD/Analog
- CS Lens Mount
- True Day & Night – ICR
- CoC Support
- Weight: 300g
- Power: DC 12V, ~100mA

## PTZ Cameras

PTZ (Pan, Tilt, Zoom) camera. PTZ cameras provide the user with the utmost freedom; It covers large areas and various distances. Provision-ISR's IR PTZs are capable of providing a bright and sharp image even in complete darkness.

Moreover, not only is the PTZ capable of performing under manual control, it can also work in an automated environment and perform a variety of pre-configured actions made by the user.

# The Ultra-Z IR Speed Dome Series

This camera has Ultra-Z's best features combined with superb night performance, thanks to the intelligent IR LED addition.

With the New Ultra-ZIR, Darkness Never Looked So Bright.

- Ultra-Fast
- High Resolution
- Ultra-Accurate
- Time Schedule Function
- Installation Friendly
- IP 66
- I/O
- IR LED ARRAY (100m)
- True day/night with ICR filter
- "Hands Free" Improved Bracket

The Ultra-Z IR was fitted with IR LEDs to give it super performance in low light.

The Ultra-Z IR is equipped with a smart synchronization system between the lens's zoom factors to the IR illumination intensity.

Meaning: perfect correlation between zoom and IR illumination: The more the camera zooms in, the stronger and narrower the IR light will be.

These IR cameras are equipped with integral 8 LED array divided into 3 groups providing different illumination angles and distances. This was designed to provide flawless illumination coverage at any focal position from the widest scene to the narrowest. Each LED group will turn on/off on it's on, to ensure an equal level of illumination and preventing over/under exposure.

The improved "hands-free" bracket:

Like all other PTZ cameras in the Ultra-Z series, the IR version is designed with a junction box. But now, not only are the cable connections external, they are also "hands free", due to a wall-connecting between the junction box and the cover holding the camera, allowing the installer to connect cables freely.

# Standalone DVR Series

## HD Analog DVRs

### Recording Solutions

DVR systems are the “heart” of any CCTV installation.

All information streamed from the cameras accumulates into the DVR. The DVR captures the video signal coming from the camera, converts and saves it in digital format. Therefore, when it comes down to the final video resolution, the DVR’s quality is as important as the cameras’. Moreover, since all the recording data is saved and rewritten over and over on the DVR, it must be an extremely reliable and high standard product.

All of Provision-ISR DVR’s are designed and manufactured according to researched and practiced knowledge over many years of experience. All DVRs use the advanced H.264 video compression format to deliver maximum video quality, while using minimum storage volume. Provision-ISR DVRs are made of the highest quality components and adapted to work in a wide-range of different conditions and applications. All of our DVRs stand out for their “full feature” operating system with use friendly graphical interface running from its powerful processor.

Depending on the model, our DVRs include digital VGA and HDMI monitor out, analog video out, audio in/out, RS-485 for PTZ control and alarm in/alarm out sockets. It is also supported by a powerful network function for remote monitoring, full remote configuration and mobile device application for remote monitoring.

## Understanding the Resolution Markings

HD Resolutions are like an inverted piramide.

If a DVR supports a resolution from the top of the piramide, it will support all resolutions lower than it. For example if a NVR supports 5MP (Real-Time) it will support 4MP, 2MP and 1MP (Real-Time)

**1080P Lite 1080P**

The first supported resolution from the left is real time for all channels. All the following resolutions are non-real-time or real-time for some of the channels.

**5MP**

The Marked supported resolution and all the resolutions below are real-time for all channels. Higher resolutions are not supported.

# 8/9/16CH Power Supply

## Features:

- High efficiency and environmental friendly design
- Optimal design for easy installation
- Stable power signal to support clear images
- Over-current protection
- "Over-voltage" output protection
- Short circuit protection
- Lock
- Individual Status LED for each Channel
- Thermal Fuses
- Backup Battery Support\*

# HDMI Accessories

## HDMI to VGA

Model: PR-HDMItoVGA

Converts HDMI output to VGA output

- Supports: all HD format up to 1080P @ 30 fps
- Support HDMI 1.4b
- No support of HDMI audio (Will be lost)
- No power required

## HDMI Repeater

Model: PR-HDeX(4K)

Repeats and regenerates a signal of HDMI input and allows the usage of a second HDMI cable for total length of up to 40m.

- Supports: all HD format up to 4K @ 30 fps
- Support HDMI 1.4b
- Support up to 40 meters total transmission distance (AWG 26 cable standard)  
1080P resolution: Input: up to 15 meters, Output: up to 25 meters  
4K resolution: Input: up to 5 meters, Output: up to 8 meters  
Note: Working Distance may be affected by the cable quality and length
- No power required

## 1 to 2 HDMI Splitter

Model: PR-SP102(4K)

Splits a single HDMI input signal into 2 identical outputs.

- Split 1 HDMI input to 2 HDMI outputs
- Support HDMI resolution up to 4K@30Hz
- Support digital audio format: DTS-HD/Dolby-true HD/DTS/Dolby-AC3/DSD/HD(HBR)
- Supported HDMI cable distance: (AWG 26 cable standard)  
1080P resolution: Input: up to 15 meters, Output: up to 15 meters  
4K resolution: Input: up to 8 meters, Output: up to 8 meters  
Note: Working Distance may be affected by the cable quality and length
- Requires DC5V power supply (USB Power cable included)

## 1 to 4 HDMI Splitter

Model: PR-SP104(4K)

Splits a single HDMI input signal into 4 identical outputs.

- Split 1 HDMI input to 4 HDMI outputs
- Support HDMI resolution up to 4K@30Hz
- Support digital audio format: DTS-HD/Dolby-true HD/ DTS/ Dolby-AC3/ DSD/ HD(HBR)  
1080P resolution: Input: up to 15 meters, Output: up to 15 meters  
4K resolution: Input: up to 8 meters, Output: up to 8 meters  
Note: Working Distance may be affected by the cable quality and length
- Include DC5V power supply

# HDMI Accessories

## 3 to 1 HDMI Switcher

Model: PR-SW301(4K)

Allows the connection of 3 HDMI sources to a single HDMI display unit. After connection the required input can be chosen manually or selected by the device automatically.

- Compatible with HDMI 1.4a
- Support up to 4K@30Hz
- Deep color 12bit per channel
- "Smart switching" function that can detect live HDMI signal in different channels and switch to it automatically
- No power supply required for standard installation. If the HDMI output cable exceeds 5m – a CD5V power supply will be required (Not included)

## AHD to HDMI/VGA/BNC Converter

Model: PR-AHD-Con

Converts AHD signal to HDMI/VGA/BNC signal for a connection of an AHD source to a standard display device.

- HDMI output compatible with HDCP, HDMI1.4
- HDMI output resolutions: 720P@50/60Hz, 1080P@50/60Hz
- VGA output resolutions: 800x600@60Hz, 1024x768@60Hz, 1366x768@60Hz, 1280x720@60Hz, 1920x1080@60Hz
- Selectable output by physical button on the device
- Supports both NTSC/PAL Video inputs –Automatic detection
- Maximum output distance: HDMI: 20 meters, VGA: 5 meters, CVBS: 500 meters
- Note: Working Distance may be affected by the cable quality and length

## HDMI Extender over Cat5e/Cat6

Transmits HDMI signal over Ethernet cable.

Model: PR-HDoNet+ / PR-HDoNet(IR)

- Working Distance: Up to 40m distance over cat5e cable. Up to 60m over Cat6 cable
- HDMI1.3 & 3D support
- 12Bit deep color and bandwidth of up to 225Mhz support
- Support video resolution of up to 1080P@60Hz
- Supported Audio formats: DTS-HD/Dolby-true HD/LPCM7.1/DTS/Dolby-AC3/DSD
- IR Signal transmission (PR-HDoNet(IR) Model only)
- DC5V power supplies included

Model: PR-HDoNet-E

- Working Distance: Up to 10m distance over cat5e cable. Up to 20m over Cat6 cable
- HDMI1.3 & 3D support
